DETAILED ACTION

Claim Objections

1. Claims 28 and 32 are objected to because of the following informalities:
 - a) Claim 28 depends cancelled claim 27.
 - b) In claim 32 line 10, "n * Fs," is missing after --than-- and before --where--.Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 2-5, 7-15, 17, 20 and 30-33 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

In claim 31 lines 23-24, it is unclear how "the switch frequency comprises a sampling rate of twice a rejection bandwidth of the BPFs". Similarly, in claim 32 lines 10-12, it is unclear how the sampling rate can be "at least twice the rejection bandwidth". As best understood from the disclosure, "rejection bandwidth" refers to the frequency ranges in which the bandpass filter rejects signals. The bandpass filter allows signals between two specific frequencies, a lower frequency and a higher frequency, to pass. If the rejection bandwidth is the region outside the two frequencies,

Art Unit: 2616

it is unclear how the sampling rate can be twice the rejection bandwidth, since there are two different bandwidth ranges (the one below the lower frequency and the one above the higher frequency).

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 2-5, 7-15, 32 and 33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 32 lines 9-10, it is unclear how the "step of multiplexing comprises multiplexing the multiple signals at a sampling rate...". Multiplexing signals is a different process than sampling signals. It is unclear how the signals can be *multiplexed* at a sampling rate.

Allowable Subject Matter

6. Claims 18 and 19 are allowed.
